

COILED WIRE

The Essential Element

When you make the choice to use Hyndman, you will make a significant, positive impact on your bottom line. You will also reduce your headaches and hassles. We become an extension of your company – a trusted resource you can rely on day-to-day and week-to-week.

Whether produced in-house or purchased, there are significant costs associated with the heating elements used in your products. At Hyndman, we pride ourselves in consistently and dependably saving our customers time, resources and money in the manufacturing of open coil heating elements.

Hyndman Coils

No element fabrication is too difficult for our experienced team.
